

Tailor-made solutions for the pharmaceutical industry

Safe, efficient, sustainable, worldwide

Your challenge – our answer

In the pharmaceutical industry, aseptic conditions, process reliability and compliance with GMP and GSP standards are crucial.

Standard solutions often result in increased cleaning effort, complex approval processes and longer project timelines.

With Ziemann Holvrieka, you can rely on tailor-made stainless steel tank and plant solutions that are CIP/SIP-capable and meet the highest regulatory requirements.

Our services for the pharmaceutical industry

Over

170

years of experience

More than

1,550

employees worldwide

128,000m²

of production area, including

25,000m²

indoor space

Production capacity
of up to

400

tanks/year

Product & manufacturing expertise

- Production of storage, process, pressure, and special-purpose tanks, as well as silos made of stainless steel
- Up to Ø 7.5 m: one-piece factory production possible; beyond that: flexible on-site assembly
- Direct waterside loading

Engineering & technology

- In-house engineering with FEM-based design
- Design in compliance with ASME BPE, GMP, GSP and FDA requirements, aseptic execution, CIP/SIP capability, validated processes and the highest standards of documentation and traceability
- Optional equipment tailored to your requirements

Project execution & service

- Highest quality standards throughout the entire project lifecycle
- Short lead times and high delivery reliability
- Global service network

Features and benefits

One-stop project execution

Technical design, manufacturing and installation provided by a single point of contact.

Efficient process integration

Our tanks, vessels and silos, together with our experienced team, reduce complexity and streamline your operations.

High-quality manufacturing

Ensures reliable processes, high plant availability and cost-efficient operation over the entire lifecycle.

Large-scale vessel technology

Large vessel volumes create economies of scale and cost-efficient production capacities.

Fast commissioning

One-piece delivery reduces on-site installation effort and enables quicker commissioning.

Future viability

Produced sustainably and with efficient use of resources

The partner for the pharmaceutical industry

Ziemann Holvrieka is your partner for certified tank and plant solutions – from design and manufacturing to integration. With global project expertise and turnkey solutions, we ensure quality, compliance and efficiency.
